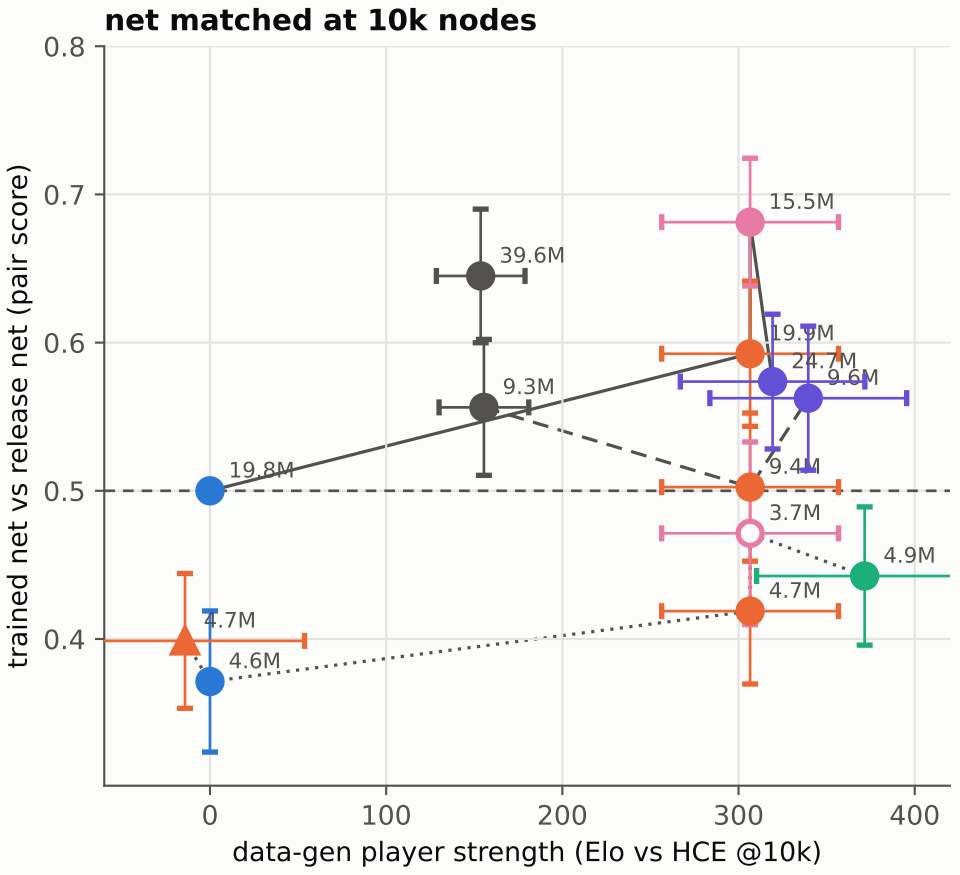
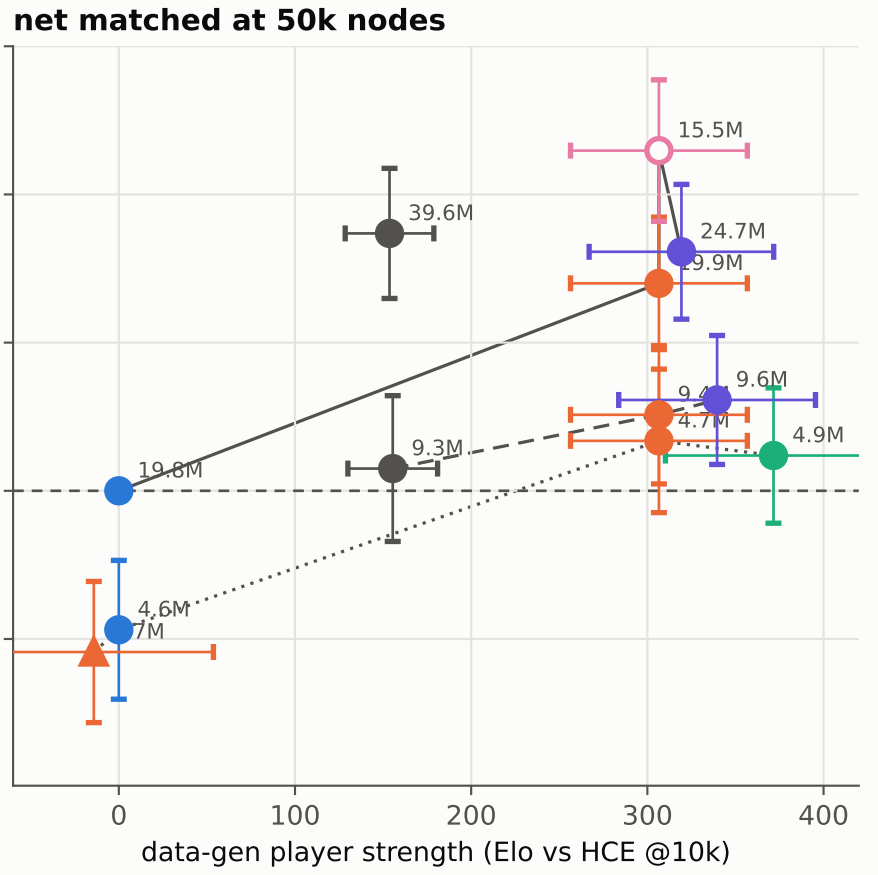
Data quality and data size together





gen0 · gen1 · gen1, moves 4+ · gen2 · mix gen0+gen1 · mix gen1+gen2 · 10k-node games · 1k-node games · line: ~5M rows · line: ~10M rows · line: ~20–25M rows · line: ~40M rows

Moving along a line = better data at the same size; moving between lines = more data. Labels = training rows. Mixes use the row-weighted average player. Hollow = from the rating fit.
